As an educator for over 13 years I sincerely hope you consider what increasing the cost of mailing educational packages would do especially for young readers. As educators we depend on scholastic to help get good fit and engaging books into the hands of our young learners and by increasing the cost of mailing, it would increase the costs of these products, lessening the chances that families will buy and purchase these materials for their beginning readers.

Please reconsider this for educational materials.

Thank you,

Jenna Rokes

Kindergarten teacher

Cody Elementary School, PVCSD
